MIS 693	Advanced Supply Chain Info Systems	2			Online			Online
DATA/MATH 611	Data Science and Analytics	3			Classroom			Classroom

Notes

Course Formats **Classroom courses:** Learners attend face-to-face class meetings; **Hybrid courses:** Course is a blend of face-to-face classroom meetings and online learning; **Online courses:** All instruction is delivered online.

Course Order Learners are encouraged to start the program with either or both of the MBA's 2-credit required courses: MGMT 600 and/or ECON 696. The program occasionally welcomes new students after the application deadline, which can mean that sections of MGMT 600 and/or ECON 696 are full for these late-admitted learners. In this case the learner may register for any other course that (1) has no prerequisites and (2) still has openings, except for MGMT 699.

After the learner's first semester, all courses may be taken in any order unless they have prerequisites. MGMT 699 should be taken in the final semester, but can be taken concurrently with another course.

Concentrations Students who opt to pursue an MBA concentration will have their 8 elective credits dictated by the requirements of the concentration they choose. They will also take one more 4-credit course (for a total of 44 credits) than students opting to earn an MBA without concentration.

Electives Students opting to not pursue an MBA concentration may select electives from among any of the graduate courses offered in the College of Management. Graduate courses offered by other Metropolitan State University colleges may be used as MBA electives at the discretion of the MBA Program Director.
